Table A1: Summary Statistics

<i>Main survey (561 respondents)</i>					
	Median	p10	p25	p75	p90
Age	26	25	25	28	30
College GPA	3.8	3.4	3.6	3.9	4.0
MCAT score	32	26	29	34	37
MLE Step 1 Score	228	198	214	244	255
MLE Step 2 Score	241	211	226	255	265
Survey completion time	18	10	14	23	38
	%				
Female	47%				
Participated in dual match	7%				
<i>Relationship status:</i>					
Single	35%				
In a long-term relationship	35%				
Married	30%				
<i>Repeat survey (131 respondents)</i>					
	Median	p10	p25	p75	p90
Age	26	25	26	28	31
College GPA	3.8	3.3	3.5	3.9	4.0
MCAT score	32	27	29	34	38
MLE Step 1 Score	228	201	216	244	253
MLE Step 2 Score	242	211	227	255	265
Survey completion time	18	10	13	24	50
	%				
Female	40%				
Participated in dual match	6%				
<i>Relationship status:</i>					
Single	34%				
In a long-term relationship	31%				
Married	35%				

Notes: Distributional information on respondent characteristics. For continuous variables, the median, 10th, 25th, 75th, and 90th percentiles are reported. Survey completion time is reported in minutes.

Table A2: Means and Standard Deviations of SWB and Attribute Ratings

	Preference Rank				
	1	2	3	4	All
Happiness during residency	82 (14)	78 (14)	76 (14)	73 (17)	78 (15)
Life satisfaction during residency	87 (13)	82 (14)	78 (14)	75 (16)	81 (15)
Ladder	88 (13)	82 (13)	77 (15)	73 (17)	80 (16)
Residency prestige and status	83 (19)	79 (19)	75 (20)	71 (21)	77 (20)
Social life during residency	75 (20)	71 (20)	68 (20)	65 (21)	70 (21)
Desirability of location	86 (19)	78 (20)	72 (23)	67 (23)	76 (22)
Anxiety during residency	55 (25)	55 (24)	54 (24)	54 (24)	55 (24)
Worthwhile life during residency	89 (13)	86 (14)	83 (16)	81 (17)	85 (15)
Stress during residency	59 (23)	58 (23)	57 (23)	57 (22)	58 (23)
Future career prospects	91 (13)	87 (13)	84 (16)	81 (17)	86 (15)
Control over life	70 (22)	68 (21)	66 (21)	66 (21)	67 (21)
Desirable for significant other	87 (20)	76 (25)	65 (28)	59 (27)	72 (27)
Average happiness in first 10 years	86 (12)	84 (12)	82 (13)		84 (13)
Average happiness in rest of career	86 (11)	84 (12)	83 (12)		84 (12)
Average happiness after retirement	86 (15)	85 (15)	85 (15)		85 (15)

Notes: Means of primary variables, by rank in the NRMP preference ordering. Standard deviations in parentheses. Based on main sample of 561 respondents.

Table A3: Test-Retest Correlations

	Correlation between wave 1 and wave 2 responses	Within-subject correlation between wave 1 and wave 2 responses
Happiness during residency	0.70	0.59
Life satisfaction during residency	0.67	0.52
Ladder	0.62	0.56
Residency prestige and status	0.78	0.71
Social life during residency	0.72	0.59
Desirability of location	0.79	0.81
Anxiety during residency	0.58	0.24
Worthwhile life during residency	0.66	0.40
Stress during residency	0.59	0.37
Future career prospects	0.64	0.52
Control over life	0.60	0.24
Desirable for significant other	0.78	0.81
Average happiness in first 10 years	0.45	0.45
Average happiness in rest of career	0.42	0.46
Average happiness after retirement	0.58	0.30

Notes: Correlation between first-wave and second-wave survey responses for the 131 main-sample respondents who participated in the follow up survey. The second column reports the correlation after variables are demeaned at the respondent level.

Table A4: Differences Between SWB and Choice Coefficients in Table 3, With p -values

	(1) Happiness during residency	(2) Life satisfaction during residency	(3) Ladder	(4) 4-period- happiness index	(5) 3-SWB- measure index	(6) 6-SWB- question index

Notes: Each column reports the difference between the coefficient estimated with choice data and the corresponding coefficient estimated with each column's SWB metric. For example, the coefficient of 1.1 reported for "Desirable for significant other" (bottom row) in the first column equals the difference between table 3's choice coefficient of 1.4 and the happiness-during-residency coefficient of 0.3. p -values are reported in *italics*, based on delta-method standard errors. * $p < .1$, ** $p < .05$, *** $p < .01$

Table A5: Table 3's Rank-Ordered Logit Estimates vs. OLS Estimates

	(1) Choice	(2) Happiness during residency	(3) OLS	(4) Life satisfaction during residency	(5) OLS	(6) Ladder	(7) OLS
Estimation Method	RO	RO	OLS	RO	OLS	RO	OLS

McKelvey & Zavoina R^2 , within variance only	0.002	0.014	0.008	0.001

Notes: Rank-ordered logit regressions of choice and SWB orderings on residency characteristics. Residencies were matched to CNN Money 2012 city rankings and their recorded city characteristics. For details on these data and variable definitions, see <http://money.cnn.com/magazines/moneymag/best-places/2012/faq/>. “On U.S. News Honor Roll” is a dummy variable which indicates residency programs associated with one of U.S. News and World Report’s “Honor Roll” hospitals. As can be seen by the small and generally insignificant point-estimates, as well as the extremely low R^2 s, these variables are generally not predictive of individual residency preference rankings or SWB rankings.

Table A12: Table 2 Restricted to 4-Period-Happiness Index Estimation Sample

Notes: This table replicates table 5, with the data restricted to only binary comparisons of the first- and fourth-ranked programs.

Table 3 by different sample cuts

The tables are the same as table 3, but with the sample restricted to various subpopulations as described in section III.B.

Table 3 restricted to single respondents	19
Table 3 restricted to respondents in a long-term relationship	20
Table 3 restricted to married respondents	21
Table 3 restricted to men.....	22
Table 3 restricted to women.....	23
Table 3 restricted to above-median MCAT scores	24
Table 3 restricted to below-median MCAT scores	25
Table 3 restricted to above-median age	26
Table 3 restricted to below-median age	27
Table 3 restricted to above-median survey completion time	28
Table 3 restricted to below-median survey completion time	29
Table 3 restricted to respondents who agreed to be re-contacted	31
Table 3 restricted to respondents who participated in follow-up survey	32
Table 3 restricted to respondents who did not participate in follow-up survey	33
Table 3 restricted to respondents who did not participate in the dual match	34
Table 3 restricted to respondents who did not report manipulation attempts by the school	35
Table 3 restricted to respondents who felt their NRMP choice order represented their true preferences.....	36
Table 3 restricted to respondents who did not feel that their NRMP choice order represented their true preferences, using their reported true preferences	37

Table 3 restricted to single respondents
