
Subject Index

- Activities of daily living (ADLs), improvements in, and pensions, 296–300
- Adult mortality: in U.K., 253–55; in U.S., 255–56
- Age distributions, mortality and, 336–42
- AHEAD. *See* Asset and Health Dynamics Among the Oldest Old (AHEAD)
- Allocations, investment, effect of automatic enrollment on, 99–107
- Antibiotics, 12, 335
- Asset accumulation: automatic enrollment and, 107–19; influence of health conditions on, 455–59. *See also* Wealth accumulation
- Asset and Health Dynamics Among the Oldest Old (AHEAD), 127–28, 130; analyzing wealth changes and mortality with, 439–43; causality tests and, 448–55; constructing variables from, 432–37; descriptive statistics and, 432; descriptive statistics for population of, 443–44; incidence of health conditions in, 448–50; measuring wealth and, 437–39; sample characteristics of, 428–32; trends in home equity at older ages of, 134–44
- Automatic enrollment: asset accumulation and, 107–19; default savings behavior and, 103–6; effect of, on contribution rates, 94–99; effect of, on 401(k) participation, 88–94; effect of, on investment allocations, 99–107; 401(k) plans and, 3–4; for 401(k) plans, in three large companies, 84–88; overview of, 81–84; participation rates and, 4
- Behaviors, changes in, and mortality, 358
- Britain. *See* United Kingdom
- British Household Panel Survey (BHPS), 207–9
- Canada, RRSP in, 19
- Cancer, 345–46
- Cardiovascular disease, 345–46, 349; deaths from, 345–49, 350–51; declining mortality rates of, after 1960, 354–55
- Chronic nephritis, 352, 353
- Civil Rights Act, 362
- College support, transfer wealth and, 194
- Contribution rates, effect of automatic enrollment on, 94–99
- DB pension plans. *See* Defined benefit (DB) pension plans
- DC pension plans. *See* Defined contribution (DC) pension plans
- Death, medicalization of, 12–13. *See also* Mortality
- Default savings behavior, and automatic enrollment, 103–6
- Defined benefit (DB) pension plans, 17–18; active participants in, 27–28; cohort data for reduction in participation in, and increased participation in 401(k)

- Defined benefit (DB) pension plans (*cont.*) plans, 56–57; contributions per participant and, 32; contributions to, 28–29; effects of legislative and return-induced downward pressures on, 33–34; “eligibility experiment” applied to assets of, 55–56; factors affecting contributions to, 31–34; 401(k) plans and, 18–19; offsets to, 18; retirement asset accumulation in, vs. DC plans, 36–46; saving rates for, and 401(k) plans, 19; scenarios for, in absence of 401(k) plans, 50–54
- Defined contribution (DC) pension plans, 18; active participants in, 27–28; contributions per participant and, 32; contributions to, 28–29; retirement asset accumulation in, vs. DB plans, 36–46
- Demographics, trends in U.S., and growth in retirement assets, 23–24
- Diet: income and, 319–21; nutrition and, 321–23. *See also* Nutrition
- Drugs, decline in mortality rates and, 345
- Dual coverage, 46; 401(k) plans and, 47–49; loss of, 49–50
- Education, mortality and, 271–74
- Elderly: data for SES and health of Russian, 315–19; home equity and, 127–30; SES and health of Russian, 313–14
- Employee savings, vs. contributions to retirement plans, 36–46
- Equities, rates of return on, U.S. vs. U.K., 218–21
- Family Expenditure Survey* (FES), 262–63
- Florida: puzzle of high health care utilization in, 389–93; puzzle of low mortality in, 389–93
- Forbes* 400, 188–89
- 401(k) plans, 17; automatic enrollment and, 3–4; automatic enrollment for, in three large companies, 84–88; average annual saving rate of, 3; cohort data for increased participation in, and reduction in DB plan participation, 56–57; contributions to, 28–29, 29n4; DB pension plans and, 18–19; dual coverage and, 47–49; effect of automatic enrollment on participation in, 88–94; offsets to, 18; projected assets of, 54–55; saving rates for, DB plans and, 19; scenarios for DB plans in absence of, 50–54. *See also* Retirement plans
- Great Britain. *See* United Kingdom
- Health: causality measurement issues for, 424–28; causality testing for, 420–24; causality tests for, in AHEAD panel, 448–55; econometric analysis of causal links to wealth, 15–16; impact of income on status of, in South Africa, 291–96; incidence conditions of, in AHEAD panel, 448–50; influence of, on asset accumulation, 455–59; models for association with SES and, 444–46; nutrition and, 323–26; possible causal paths for, 415–18; relative risk for, 446–48; role of nutrition and, 314–15; SES, nutrition and, 10–11; SES and, 313–14; simulation of interventions for conditions of, 459–67; ways pensions improved, in South Africa, 296–304; wealth and, 8–11; and wealth in South Africa, 10
- Health and Retirement Study (HRS), 57–58, 127–28, 130; data limitations in, 58–62; 401(k) eligibility of respondents in, 62–64; trends in home equity at older ages and, 134–44
- Health care, age differences in, and mortality, 13–15
- Health care utilization: correlations among different measures of, 378–80; data and estimation strategy for, 373–74; factors appearing to explain, 383–86; indexes of, by region and population size, 377–78; puzzle of high, in Florida, 389–93; studies of regional variations in, 369–72; study results for, 374–77
- Home equity, 4–6; AHEAD trends for, 134–44; change in, 147–54; elderly and, 127–30; estimates of, based on selling price, 158–69; events that precipitate changes in, 144–47; formal estimates of change in, 156–58; housing price uncertainty and, 227–28; HRS trends for, 134–44; puzzle of, 7–8; ratio of, and other assets, to disposable income, 22–23; respondent estimates of, vs. sale prices, 154–56
- Home ownership: model implications for,

- 234–42; rates of, U.S. vs. U.K., 211–15; U.S. vs. U.K., 221–25; young households and, 229–34
- Household wealth, sources of, 181–82. *See also* Wealth
- Housing equity. *See* Home equity
- Housing prices, uncertainty of, 227–28
- Housing services: supply of, 228; model predictions for, 228–29
- Housing tenure, model for, 225–27
- HRS. *See* Health and Retirement Study (HRS)
- Income: British data for, 262–63; dietary patterns and, 319–21; empirical model for effects of, on mortality, 263–66; impact of, on health status, in South Africa, 291–96; role of, and mortality rates, 9; study results for effects of, on mortality in U.S. and U.K., 266–74; summary of previous work on mortality and, 260–62
- Income inequality: British data for, 262–63; empirical model for effects of, on mortality, 263–66; study results for effects of, on mortality in U.S. and U.K., 266–74; summary of previous work on mortality and, 260–62; U.S. vs. U.K., 248–51
- Individual Retirement Accounts (IRAs), 3, 17; contributions to, 28–29; offsets to, 18. *See also* Retirement accounts
- Infant mortality, 355–58; nonwhite vs. white, 362, 363; U.S. vs. U.K., 251–53
- Infectious diseases, 12, 335, 344–45; deaths from, after 1960, 354; in midcentury period, 349
- Influenza, 345, 346; midcentury decline in deaths from, 349
- Inter vivos gifts, 181, 183, 185
- Inter vivos transfers, 189, 191, 193
- Investment allocations, effect of automatic enrollment on, 99–107
- Keogh plans: contributions per participant and, 32; contributions to, 30
- Kidney disease, 352
- Labor force, aging of, 23–24
- Langeberg Survey (South Africa), 288–91
- Life-cycle hypothesis (LCH), 181, 182–83
- Life-cycle saving, 182–83, 198
- Life-cycle wealth, 181, 186–87
- Life expectancies, 336–42
- Medicaid, 360, 362
- Medical care. *See* Health care
- Medicalization of death, 12–13, 335, 354–55
- Medical technology, mortality and, 257–60
- Medical utilization. *See* Health care utilization
- Medicare, 360
- Money. *See* Wealth
- Mortality: adult, in U.K., 253–55; adult, in U.S., 255–56; age differences in medical care and, 13–15; age distributions and, 335–42; changes in, over twentieth century, in U.S., 11–13; changes in age distribution and, 336–42; declining rates of, after 1960, 354–58; education and, 271–74; empirical model for effects of income and income equality on, 263–66; explanations of variation in, across MSAs, 14–15; factors appearing to explain rates of, 386–88; factors influencing, 358–62; first four decades of twentieth century and, 343–49; income and, 9; indexes of, by regions, 380–81; medical technology and, 257–60; midcentury medical advances and declines in, 349–53; patterns of, U.S. vs. U.K., 248–60; pooling U.S. and U.K. data and, 274–78; public health and reduction in, 12; puzzle of low, in Florida, 389–93; puzzle of positive correlation of African Americans and mortality of whites, 388–89; rates of, in U.S. vs. U.K., 8–9; reasons for decline in, 335–36; regional variations in, 372–73; SES and, 358–60; smoking and, 272–74, 355, 356; study results for effects of income and income inequality on, in U.S. and U.K., 266–74; summary of previous work on income and income inequality and, 260–62; in U.S., 333
- National Income and Product Accounts (NIPA), 2
- Negative election. *See* Automatic enrollment
- NIPA (National Income and Product Accounts) savings, retirement plan contribution rate and, 34–36

- Nutrition: health and, 323–26; income and diet and, 319–21; mortality and, 335; reduction in mortality rates and, 12; role of, and health, 314–15; SES and health and, 10–11
- Panel Survey of Income Dynamics (PSID), 128, 206–8
- Participation rates, automatic enrollment and, 4
- Penicillin, 349
- Pension plans. *See* Defined benefit (DB) pension plans; Defined contribution (DC) pension plans
- Pensions, and improvements in health, in South Africa, 296–307
- Personal retirement plans, 2–8. *See also* Retirement plans
- Pneumonia, 345, 346; midcentury decline in deaths from, 349
- Policies, social, mortality rates and, 360–62
- Private Security Accounts (PSAs), 77
- Psychological stress, pensions and, in South Africa, 302–4
- Public health, reduction in mortality rates and, 12
- Registered Retirement Saving Program (RRSP), DB pension plans and, 19
- Retirement accounts: aggregate assets in, 20–21; private assets in, 21–22; public and private assets in, 22. *See also* 401(k) plans; Individual Retirement Accounts (IRAs)
- Retirement ages, retirement assets and, 23–24
- Retirement assets: demographic trends and growth in, 23–24; plan contributions to, 25–26; substitution between, 46–57
- Retirement plan contribution rates, 19, 26; DB plans and, 31–34; NIPA savings and, 34–36; stability of, 26–27; time series changes in, 26–31
- Retirement plans: contributions to, 25–26; contributions to, vs. employee savings, 36–46; HRS evidence for substitution in, among older workers, 57–58; participants in, 30–31; substitution between, 19
- Retirement saving plans, growth in employee-managed, 17–18
- Retirement savings, in U.S., 2–3
- Roemer's Law, 371
- RRSP. *See* Registered Retirement Saving Program (RRSP)
- Russia: data for SES and health among elderly in, 315–19; relationship between health and SES for elderly in, 10–11; SES and health of elderly in, 313–14
- Russian Longitudinal Monitoring Survey (RLMS), 315
- Sanitation improvements, and health status, in South Africa, 301–2
- Savings: employee, vs. retirement plan contributions, 36–46; life-cycle, 182–83, 198; NIPA, retirement plan contribution rate and, 34–36; rates for, and DB pension plans, 19; for retirement, in U.S., 2–3
- Savings behavior: default, and automatic enrollment, 103–6; life-cycle hypothesis for, 181, 182–83
- SES. *See* Socioeconomic status (SES)
- Smoking, mortality and, 272–74, 355, 356, 358, 359
- Social policies, mortality rates and, 360–62
- Social Security, 360–62; reforming, 76–77
- Socioeconomic status (SES): causality measurement issues for, 424–28; causality testing for, 420–24; health and, 313–14; indexes of, by regions, 381–82; models for association with health and, 444–46; mortality and, 358–60; nutrition and health and, 10–11; possible causal paths for, 415–18; relative risk for high vs. low, 446–48
- South Africa: impact of income on health status in, 291–96; improvements in ADLs and pensions in, 296–300; Langeberg Survey in, 288–91; nutrition improvements, and pensions in, 301–2; psychological stress improvements, and pensions in, 302–4; sanitation improvements in, and pensions in, 300–301; ways pensions improved health status in, 296–307; wealth and health in, 10
- Stock ownership: housing price uncertainty and, 227–28; rates of, U.S. vs. U.K., 215–18; U.S. vs. U.K., 221–25
- Suicide, 360, 361
- Sulfa drugs, 345, 349

- Survey of Consumer Finances (SCF), 182, 184, 188
- Survey of Income and Program Participation (SIPP), 127–28; data on home ownership and equity over life course, 131–34
- Technology, medical, mortality and, 257–60
- Transfer wealth, 7, 182; college support and, 194; defining, 202; direct estimation of, from survey data, 184–89; estimation of, from flow of transfers, 189–94; importance of, 198; ratio of, to total wealth, 195–98; studies of, 182–83; survey data for, 184. *See also* Wealth
- Tuberculosis, 345, 347
- United Kingdom: adult mortality in, 253–55; home ownership and stock ownership in, 221–25; household wealth distributions in, 205–6; housing prices in, 220–21; income inequality in, 248–51; infant mortality in, 251–53; model implications for housing in, 234–42; model predictions for housing services in, 228–29; mortality rates in, 8–9; patterns of mortality in, 248–60; rates of home ownership, vs. U.S., 211–15; rates of return on assets in, 218–21; rates of stock ownership, vs. U.S., 215–18; study results for effects of income and income inequality on mortality in, 266–74; wealth at retirement in, 7–8; wealth distributions in, vs. U.S., 209–10; young households and home ownership in, 229–34
- United States: adult mortality in, 255–56; changes in mortality over twentieth century in, 11–13; demographic trends in, and retirement assets, 23–24; home ownership and stock ownership in, 221–25; household wealth distributions in, 205–6; income inequality in, 248–51; infant mortality in, 251–53; model predictions for housing services in, 228–29; mortality rates in, 8–9, 333; patterns of mortality in, 248–60; rates of home ownership, vs. U.K., 211–15; rates of return on assets in, 218–21; rates of stock ownership, vs. U.K., 215–18; retirement saving in, 2–3; study results for effects of income and income inequality on mortality in, 266–74; wealth at retirement in, 7–8; wealth distributions in, vs. U.K., 209–10; young households and home ownership in, 229–34
- Utilization. *See* Health care utilization
- Vaccines, 345, 348
- Walton, Sam, 189
- Wealth: econometric analysis of causal links to health, 15–16; health and, 8–11; and health in South Africa, 10; life-cycle, 181; measuring, from AHEAD data, 437–39; at retirement in U.S. and U.K., 7–8; simulation of health care interventions on, 459–67. *See also* Household wealth; Transfer Wealth
- Wealth accumulation: automatic enrollment and, 107–19; methods of, 6–7; in U.S. and U.K., 7–8. *See also* Asset accumulation
