

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: American Agriculture, Water Resources, and Climate Change

Volume Authors/Editors: Gary D. Libecap and Ariel Dinar, editors

Volume Publisher: University of Chicago Press

Volume ISBNs: 978-0-226-83061-2 (cloth); 978-0-226-83062-9 (electronic)

Volume URL: <https://www.nber.org/books-and-chapters/american-agriculture-water-resources-and-climate-change>

Conference Date: May 12-13, 2022

Publication Date: December 2023

Chapter Title: Acknowledgments, “American Agriculture, Water Resources, and Climate Change”

Chapter Author(s): Gary D. Libecap and Ariel Dinar

Chapter URL: <https://www.nber.org/books-and-chapters/american-agriculture-water-resources-and-climate-change/acknowledgments>

Chapter pages in book: p. ix

---

## Acknowledgments

---

This volume was made possible by two generous grants from the Economic Research Service (ERS) at the US Department of Agriculture (grants #58-6000-7-0114 and #59-3000-7-0102/3) to the National Bureau of Economic Research (NBER). It is part of a multiyear research initiative at the NBER on agricultural economics. We are grateful to Spiro Stefanou, the administrator of ERS, and James Poterba, the president of the NBER, for their support of this initiative. We would also like to thank Helena Fitz-Patrick for outstanding assistance in the editorial process and in shepherding the papers toward final publication, Denis Healy for expert oversight of the USDA research grants to NBER, and Carl Beck and the NBER Conference Department staff for supporting the meeting at which the papers in this volume were presented.

We acknowledge the invaluable input and feedback from the six dedicated discussants of the papers presented in the conference leading to this book: Andrew Ayres, Research Fellow, Water Policy Center, Public Policy Institute of California; Tamma Carleton, Assistant Professor of Economics, Bren School of Environmental Science and Management, University of California Santa Barbara; Zeynep Hansen, Professor of Economics, Boise State University; Lynne Lewis, Elmer W. Campbell Professor of Economics, Bates College; Prabhu L. Pingali, Professor of Applied Economics and Director of the Tata-Cornell Institute, Cornell University; and Karina Schoengold, Associate Professor of Economics, University of Nebraska-Lincoln.
